## OBJECTIVES OF THE PROGRAMME

This FDP focus on fundamental concepts and techniques related to Machine Learning, Deep Learning, Big Data, IoT and Data Science. The primary objective of this one-week Faculty Development Program (FDP) on Research Applications in Artificial Intelligence and Machine Learning was to enrich faculty members of Computer Science stream with preliminaries of artificial intelligence and its modern applications in machine learning and deep learning. The FDP was divided into several modules falling under the umbrella of Artificial Intelligence including Machine Learning, Deep Learning, Data Science, Natural Language Processing and Digital Image Processing. The objective was to address modern trends in the field of Artificial Intelligence with real time problem solving. This FDP focused on hands-on implementation of various algorithms to deliver practical skill to participants.

## OUTCOMES OF THE PROGRAMME

The primary goal of the FDP is to equip educators and researchers with an extensive grasp of the real-world implementations of Artificial Intelligence (AI), Machine Learning (ML) and Data Science (DS). Throughout the program, participants will gain in-depth insights into the practical applications of these cutting-edge technologies, enabling them to effectively integrate AI, ML and Data Science concepts into their teaching, research, and professional endeavors. By the end of the program, attendees will possess a comprehensive understanding of how AI and ML can be harnessed to address complex challenges across various domains, thus empowering them to contribute meaningfully to advancements in these fields.
